Tasting Discussion

The Wine Cellar at the Lambertville Station

Presenter: Alan Levinson |South of the Border Wine Pairing

"South of the Border" highlights the dramatic landscapes of Chile and Argentina, where vineyards are shaped by natural extremes. Chile's long, narrow geography is cooled by the Pacific Ocean and protected by mountains, while Argentina's vineyards sit at high elevations along the Andes, benefiting from intense sunlight and cool nights. These contrasting conditions influence balance, freshness, and intensity, creating distinctive wines that reflect the power and diversity of South America.

Course 1
